DETAILED ACTION

Status of the Claims

Claims 1-15 and 20-22 have been canceled. Claims 18 and 19 are currently amended. Claims 16-19 are pending. Any objection or rejection not expressly repeated has been withdrawn. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

Claims 16, 17, and 19 are again rejected under 35 U.S.C. 103(a) as being unpatentable over REIFF et al (US 4,108,814) in view of BRIGHT et al (J. Appl. Biotechnol., 1975), as set forth in the previous Office action.

Applicant's arguments filed May 3, 2005 have been fully considered but they are not persuasive. Applicant contends that the examiner's premise, based on the teaching of BRIGHT, is false because citing example 2 of the specification, "it is possible to treat olefins with bisulfite and not get formation of the sulfonate/sulfinite product." This appears to conflict with Applicant's specification. At the paragraph bridging pages 18 and 19, the specification reviews the literature (discussing BRIGHT among others) regarding the addition of sulfites to olefins and concludes that these known methods lead to significant by-products. The passage goes on to note that Applicant has found that by controlling a number of variables that the formation of sulfinate can be varied, so that it can be eliminated ^{or} ~~or~~ maximized. It appears that in the specification, ~~it~~ ^{LCM} Applicant's position (in agreement with that of the examiner) that at the time the invention one

Art Unit: 1623

of ordinary skill would prepare a compound such as that taught by REIFF by the addition of a sulfite to an olefin using a process that would more likely than not result in these by-products. The examiner would further note that even in example 3, using pH control, the formation of the sulfinate/sulfonate is seen.

Allowable Subject Matter

Claim 18 is allowed. WEIPERT (US 6,500,981) teaches the treatment of epoxybutene with sodium metabisulfite, as discussed in the previous Office action. NIPPON SYNTHETIC CHEM (JP 59-58026) teaches the addition of sulfite to 2-butene-1,4-diol. Neither of these references teaches or fairly suggests the instant composition of a process likely to lead to such a composition.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
